DO's

- ✓ Make sure that you are perfectly comfortable and that you are sitting at the right height for the work table.
- ✓ Do check for correct tension in the bobbin
- ✓ Do insert the needle correctly as directed in the manual.
- ✓ Do clean, oil (where applicable) and do general maintenance on your machine regularly. Remember to turn off your machine first.
- ✓ For pivoting the fabric material always make sure that the needle is down, and it is always preferable to sew from the hand wheel when sewing at the edge of the fabric.
- ✓ Make sure all the screws are tightened properly after the machine is opened for maintenance or for other reasons.

DONT's

- ✗ Do not use bent needles.
- ✗ Do not pull or push fabric while stitching. It may deflect the needle and causing it to break.
- ✗ Do not unplug by pulling the cord. To unplug, grasp the plug , not the cord.
- ✗ Do not operate where aerosol products are being used or where the oxygen is being administered.
- ✗ To disconnect turn all contr[ols to the off position, then remove the plug from the outlet.
- ✗ Always use the proper needle plate. The wrong plate can cause the needle to break.
